

QUEENS' SCHOOL
Dare to be Scientific

On Monday 23 June, 13 Year 10 students attended a BioPhysics Impact Day at Oxford University.

Students took part in 3 exciting workshops looking at the links between Biology and Physics, such as 'Seeing the Invisible' a session exploring scales and how we use Physics to 'see' what is happening inside our bodies on a nanoscale. Students were then given a tour of the laboratories and lecture theatres in the Department of Physics. The best part of the day was the Q+A panel with PhD students in a range of fields including Medical and Theoretical Physics.

Thank you to Mrs Davies and Mr Burr for taking the students to Oxford!
